Experience

LEEDS TEACHING HOSPITALS NHS TRUST**Business Analyst**

Leeds, UK

Aug 2022–Present

- Eliminating major developer rework by effectively overseeing requirements gathering, meetings with stakeholders and scope definition
- Generating revenue by leading large-scale projects as both Scrum lead and cross-department liaison.
- Reducing average project completion time via detailed sprint planning, story mapping, swim lane development, backlog management and UAT
- Analyzing and collaborating with stakeholders on business requirements to identify gaps in business processes and product requirements to create action plans

LEEDS TEACHING HOSPITALS NHS TRUST**Senior Project Analyst**

Leeds, UK

Sep 2021–Aug 2022

- Boosted revenue by extracting data, identifying trends, and solving problems using innovative approaches to data-driven business analytics.
- Increased the overall development efficiency by optimizing reporting for the IT team by moving from flat file (CSV) reports to a dynamic web dashboard.
- Wrote user stories and acceptance criteria to capture business requirements for successful software implementations
- Conducted interview for requirements gathering from management team and subject matter experts

LEEDS TEACHING HOSPITALS NHS TRUST**EHR Developer Intern**

Leeds, UK

Jul 2019–Sep 2021

- Reduced manual labor by created an automated system for clinicians to submit their 'Requests for Work' which are then logged on to the in-house Jira which is used to this day
- Improved transparency by implementing an automatic e-mail service which notifies stakeholders of the status of their project
- Reduced errors and improved visualization to aid the Networks team by integrating a Telegraf system dashboard using Grafana and influxDB
- Improved the Electronic Health Record by developing e-Forms used by clinicians to record patient data.
- Built and maintained dashboards, custom lists, and assisted developers in the creation of different APIs.

CAREBIG**Web Developer**

Leeds, UK

Sep 2017–Jun 2018

- Helped design a system that allows users to find freelance caregivers
- I designed, coded, and modified the front-end of the web application to meet technical requirements.
- I created and maintained the caregivers' database, as well as the profiles which appear on the front-end.
